Employment History

National Physical Laboratory (NPL), Teddington October 2008 – Present
New Media Specialist

Working in the Communications department developing websites, project management, brand development and photographer for internal and external publications. Qualified deputy first aider.

National Physical Laboratory (NPL), Teddington August 2007 – August 2008

University Placement: Technical Co-ordinator (Online Media & Communities)

Working in the Knowledge Transfer department, developing websites, recording events and presentations, assisting and recording of events in the virtual world Second Life, general tech support.

Kingston University (Computing, Information Systems & Mathematics Faculty) March 2007 - July 2009
Student Ambassador on Open Days

Since Spring 2007 I've been selected by Kingston University to represent the CISM Faculty at various Open Days. My duties include helping staff organise the faculty stand and then providing insights and answering questions to prospective applicants to the faculty about the university and course, as well as escorting visitors around the building to where they need to go.

The CAD Workshop Ltd, Torquay November 2002 – September 2005

IT & General Office Assistant

My duties involved organising and filing letters and catalogues, computer maintenance of the office machines, supervising the office while other employees were absent, dealing with clients and money, looking after the Internet Café section of the office and helping customers and sorting out charges. This experience helped to build my confidence, especially around the general public and helped me improve my customer service skills with customers and clients at the company.

Technical Experience

Computer applications which I have a good understanding in are Microsoft Office, Adobe Photoshop, Adobe Premiere, Zend Studio and SQL Server. I am currently learning Macromedia Flash and Adobe After Effects and Microsoft Visual Studio. Programming languages which I am fluent in are XHTML, XML, CSS, PHP and SQL. Languages which I am currently learning are Java, JavaScript, and XSLT. I have a wide range of knowledge regarding hardware, from building my own home computer to building several wired and wireless networks as well as diagnosing and repairing faults.

Interests

I am interested in new developments in technology and the media as well as the overall technical aspects of television and DTT, to increase my knowledge and help keep me familiar with current and new advances. I also like to keep track of current affairs as I am interested in news events happening in the world around me. In my spare time I enjoy digital photography and videography because I like capturing events and moments on record. I like travelling and exploring new places to broaden my knowledge and interest in other regions in the UK as well as other countries such as North America and Asia.
